

Story:Customer Logging In		Priority	
		Effort	
As a	Customer		
I want	to be able to log into the booking system		
So that	I can make a booking for my optometrist		
Acceptance criteria	Criterion 1:		
	Given that the entered account details are correct		
	When the customer hits the login button		
	Then the user is sent to the main menu.		
	Criterion 2:		
	Given that the entered details are incorrect		
	When the customer hits the login button		
	Then ensure the “details not correct” message is displayed.		
	And the password field is cleared.		

Story: Customer Registration		Priority	
		Effort	
As a	Customer		
I want	to register an account with the booking system		
So that	I can later make bookings with my dentist		
Acceptance criteria	Criterion 1:		
	Given that the user has entered in all their details		
	And their email isn't in use.		
	And their password is valid based on password restrictions (long enough, etc...)		
	When the customer hits the registration button		
	Then ensure their account is created		
	And they are sent to the login screen.		
	Criterion 2:		
	Given that the user has entered in all their details		
	And their password is NOT valid based on password restrictions (long enough, etc...)		
	When the customer hits the registration button		
	Then show the user a message informing them their password is not secure enough.		
	And they are shows the registration screen, with the password field highlighted.		
	Criterion 3:		
	Given that the user has entered in all their details		
	And their password is valid based on password restrictions (long enough, etc...)		
	Although, their email is currently in use already.		
	When the customer hits the registration button		
	Then show the user a message informing them their email is in use already.		
	And they are shows the registration screen, with the email field highlighted.		

Story: Adding a new employee		Priority	
		Effort	
As a	Business Owner		
I want	to add a new employee to the booking system		
So that	customers can book with them, and view their availabilities		
Acceptance criteria	Criterion 1:		
	Given that the employee’s details are valid		
	When the hits the “Add Employee” button.		
	Then ensure the employee is added to the business		
	And a confirmation message is shown.		
Acceptance criteria	Criterion 2:		
	Given that the details entered are not valid		
	When the hits the “Add Employee” button.		
	Then ensure a message is shown displaying the error.		

As a customer I want to view the available appointments at my local doctor.
